WHAT NEXT – TO BUILD AN INDUSTRIAL BOREHOLE

9,500,000

Estimated cost of intended borehole

10,000 +

Estimated number of people the borehole will serve

Some items for the intended borehole

- 15 feet Tank Stand
- Four (4) Three Thousand Liters GP Tank
- Plumbing and Tap Stand
- Solar Panels Set

(Duration of Drilling – 3 weeks or 21 days, also due to the Topography of this community which is on the Hill, to sink an Industrial Borehole costs more).

**Solar-Powered
Water Reservoir Facility
Prototype**

- 10,000 Gallons Storage Capacity Tanks
- Solar Power Facility
- Control Station
- Water delivery Pumps

Is There A Space For The Borehole?

The King and Leaders of the Community showed us a portion of Land belonging to the whole Community for the project and the King approved that the project should commence with immediate effect.

This project is expected to contribute to the decrease in diseases associated with water shortage such as scabies, diarrhea, and typhoid, help the community wash their hands always to avoid the Covid-19 virus and also for agricultural purposes.

This is an opportunity towards solving a global water challenge set by the **United Nations SDG 6 Goal**.

Rector Cares

Rector Cares Foundation is a non-profit organization working to provide clean water to lacking rural areas in Nigeria.

In Nigeria People are dying, Clean water is the cure. With a population of over 190 million, Nigeria is particularly vulnerable to the Covid-19 Pandemic and 'Hand washing' is a key defence against the virus. Sadly, over 55 Million Nigerians still live without a source of clean water, hence, the Rector Cares Foundation started a challenge called the #Covid19waterchallenge to provide clean and safe water to some identified communities.

As part of our initiative to help fight the COVID-19 pandemic, Rector Cares Foundation wants to partner/collaborate with Union Bank Plc to provide access to clean water, alongside improving sanitation, hygiene and Agriculture to many communities in Nigeria. We are also looking to support opportunities to empower women and youth, as well as strengthen health systems of these communities in Nigeria.
